## Teen Take and Make Kits: Mod Podge Crafts

### Supplies Provided:

- Decorations
- Paint brush

### Supplies Needed From Home:

- Glue

### Directions:

1. To make homemade mod podge, you'll need to add  $\frac{1}{3}$  cup of water to 6 oz of washable liquid kids glue, and mix thoroughly. (It works best if you put it in a jar and shake for 1 minute to mix.)
2. Use the paintbrush to spread the glue mixture over a section of the surface of your project. Place tissue paper or scrapbook paper on top of the glue mixture, and smooth it down. Spread more glue mixture on top of that.
3. Add any embellishments to finish off your project!
