

Vernon Area Public Library Teen Take and Make Kits: Winter Scene Jars

Supplies Provided:

- Glass Jar
- Snowflakes
- Decorations
- String
- Lights

Supplies Needed From Home:

- Glue (preferably hot glue, or super glue)

Directions:

1. Glue your decorations to the underside of the jar's lid. Be careful to make sure they are enough in the middle, and not going to spill outside of the lid. Allow the glue to dry completely.
2. With the jar right side up, pour in your snowflakes and arrange your lights in a circle around the edge of the inside of the jar. Keep the switch on the outside.
3. Screw the jar shut, and then wrap the string around the mouth of the jar and tie it decoratively. You may need to trim the top of the tree to fit inside the jar.
