## Teen Take and Make Kits: Shrinky Dinks

### Supplies Provided:

- Markers
- Shrinking plastic film
- Keychains

### Supplies Needed From Home:

- Scissors
- Parchment Paper
- Baking sheet

### Directions:

1. Preheat the oven to 325°F.
2. Plan your design and draw it with sharpie on the plastic sheet in a normal size. Make your own design or trace onto the plastic film. The sheet will shrink down into a tiny shape, so only use one design per sheet.
3. If you're using this as a keychain, punch the hole out in the paper before you bake it. Cut around the design and the hole so it's at your desired shape.
4. Line the baking sheet with a sheet of parchment paper, and place your designs on the paper.
5. Cook the shrinky dinks for 1-3 minutes. You will see the plastic curl and twist as it heats up. Wait 30 seconds after the last one is laying flat. Watch the oven closely while shrinking.
